

Important information

Very important to know that you shouldn't start take Aciphex if you are allergic to:

esomeprazole (Nexium), lansoprazole (Prevacid), or pantoprazole (Protonix), omeprazole (Zegerid, Prilosec). Very often many patients confused the heartburn with the first symptoms of a heart attack. Call your doctor at once if you have heavy feeling in the chest or have chest pain, sweating, pain spreading to the shoulder or arm and a general ill feeling, nausea. This drug is not for immediate relief of heartburn symptoms!
